

# Multiply

## Helping you help your children

If you're aged 19 and over and don't have maths GCSE at grade C (or equivalent), you can access free numeracy courses through **Multiply** to build your confidence with numbers.

**Multiply** is a government-funded scheme to help adults improve their numeracy skills. These can help in everyday life, such as helping your children with their homework and making your money go further. They also may lead to you getting a qualification that can unlock job opportunities and lead to higher wages or prepare you for further study.

If you are interested in short, flexible courses that could improve your maths skills so that you can help your children with theirs, talk to teachers about what is planned in this school.
