Dear Parents/Carers,

To replace the multiplication square aspect of your child's homework we have subscribed to an online resource and app called "Learn with Emile". This means your child has free access to this resource and we would like you to encourage regular use at home. Your child's class teacher will set them a multiplication task on the app for them to complete for the following Friday. The children's calculation and sentence homework can still be found on google classroom.

Here's what you need to know about 'Learn with Emile':

IT'S FREE: The app can be downloaded for nearly all devices (including mobiles) from here: <https://emile-education.com/app-downloads/learn-with-emile-app-download/> or from the Microsoft, Google Play or Apple Stores – it's called "Learn with Emile". A web version can also be accessed using a browser: <https://web.emile-education.com>.

HELPS STUDENTS: The resource has been shown to have significant improvements in learning outcomes when used regularly. Please help encourage your child to use it for at least 10 minutes a week.

STUDENTS ENJOY PLAYING THE GAMES: The resource works by students being assessed, and then allocated games and activities at their level. Students really enjoy playing the games, getting live feedback and making progress.

MULTIPLAYER GAMERS: Students can compete in groups or as a class at their own difficulty level. The use of competition and multiplayer games is a great way to encourage engagement. As the students will be competing at their own level, they will be able to beat their competition irrespective of level, so there's no reason for anyone to become discouraged.

TAMAGOTCHI: Every student gets a Tamagotchi on the app to look after and customise using points and coins earned by improving their level and playing games.

PARENTAL SUPPORT IS CRITICAL: For children to be fully motivated and for them to get the best out of the practise, they need an adult’s help. Without a parent’s praise and reminders and without sitting down together or checking their work, practising will not feel important.

The children have taken part in a launch assembly where they were introduced to the app. Further information and help can be found in user-guides on the app under the ‘About Us’ tab or via this link <https://emile-education.com/user-guide/>.

Your child’s username and password can be found below.

If you have any technical issues, please let Emile know at hello@emile-education.com
